

DOORCE - DATA OPENER CENTRAL EUROPE

All over central Europe, public and private institutions gather data that should be openly available but that instead, are often not easily accessible and lack real-time updates.

The DoorCE project changes this by establishing local open data hubs. In these, the partners help institutions to offer high-quality, dynamic data that are accessible to all citizens through innovative digital services. The partners support innovators, smaller companies and public authorities to utilise and share data more efficiently through newly developed, user-friendly tools for data digitalisation and management.

This project is supported by the Interreg CENTRAL EUROPE Programme with co-financing from the European Regional Development Fund.

PROJECT BUDGET

2,34 m €

DURATION

Start Date **06.2024**

End Date **11.2026**

The team active in the DoorCE project is composed by organisations with different experiences and expertise in the field of open data.

10 PARTNERS

7 COUNTRIES

Warsaw University of Technology

Warszawa

Lead Partner | Will lead the development of open data tools and support strategy preparation and pilots.

POLAND

Municipality of Sopot City

Sopot

Develops the Sopot Open Data Platform and manages the pilots, focusing on the data to be published.

Warsaw

City of Warsaw

Warszawa

Provides requirements for a non-digital data collection and digitisation tool, the basis for a prototype.

AUSTRIA

Informations- und Kommunikationstechnologie **L_nz**

ICT Linz Ltd.

Linz

Provides expertise on open data sharing and regulation, participating in pilots and linking government portals.

CROATIA

GRAD ZADAR

City of Zadar

Zadar

Develops the Zadar Open Data Platform and provides data on air quality, transport, budget and public services.

GERMANY

aconium

aconium GmbH

Berlin

Will lead WP1, representing small administrations and rural challenges, and support the assessment of pilots.

ITALY

FOS S.p.A.

Genoa

Coordinates project communication, develops strategies for secure public data and supports pilots.

Liguria Digitale

Liguria Digitale Ltd.

Genoa

Provides technical input on data, software and security, and guides the development of the dynamic tool.

SLOVAKIA

TREXiMA

TREXIMA Bratislava, Ltd.

Bratislava

Contributes to the open data and security strategy, participates in pilots and organizes events.

SLOVENIA

MUNICIPALITY VELENJE

Municipality of Velenje

Velenje

Develops the Velenje Open Data Platform, manages pilots and focuses on opening institutional data.
